## EDUCATION

**A.A.S. Computer Programming** Anticipated: April 2027

*Brigham Young University - Idaho* *Rexburg, ID*

- Acquired interactive experience in class with FPGAs, PCBs, STM32 and Arduino Microcontrollers.
- Created several Embedded Systems projects both for personal exploration and course final projects. Developed a Raspberry Pi-based game for a BYUI Hackathon and won third place prize.

## EXPERIENCE

**Laser tag Crew Programmer** April 2026 - July 2026

*Brigham Young University-Idaho* *Rexburg, ID*

- Debugged problems on the network of 40 laser guns, 40 headband sensors, 8 respawn boxes and 2 displays. Fixed network and technical problems in the field mid-game to get players back to playing.
- Programmed new and original game modes for the participants to play. Includes programming logic and game design. Playtested new modes and gave positive feedback to other programmers' custom game modes.

**Classroom Technology Technician** September 2024 - July 2025

*BYU-I Information Technology* *Rexburg, ID*

- Diagnosed and resolved specific and unique technical issues encountered by the university's professors and students. Fixed issues both in-person and by remote access software.
- Gave helpful and specific feedback to professors in need of tech support. Showed professors how to fix the problems encountered for future reference. Showed patience with every professor.

**Junior IoT Engineer** June 2021 - August 2021

*Robauto Inc.* *Longmont, CO*

- Coordinated with a team of three to create a product to assist bedridden patients for a contracted client. Leveraged a water cooling system on a pillow design and designed the path of tubes in a comfortable way.
- Designed and implemented a microcontroller project, remotely controlled lighting system using LEDs connected to an Arduino. Used software such as KiCAD for design, and hosted website using AWS.

## SKILLS AND ABILITIES

- Developed advanced embedded systems projects with a diverse set of microcontrollers.
- Proficient in communication and problem-solving skills.
- Fluent in Assembly, C, C++, C#, Java, JavaScript, HTML/CSS, Python, and Erlang.
- Initiates projects accessing the Linux interface on Personal Computers and Raspberry Pi.

## ACCOMPLISHMENTS

- Graduated from Skyline High School with a diploma and STEM certificate.
- Honored at National Center for Women & Information Technology (NCWIT) Aspirations in Computing.
- Passed Entry-level Python Programming Certification.
- ACIT and ACMT Apple Certifications earned at the SVVSD Innovation Center.
